

# NEW NON-CONNECTED THERMOSTATS FOR 2019

BUILT TO A HIGHER STANDARD™  
*American Standard*®  
 HEATING & AIR CONDITIONING

## OVERVIEW

### »» IMPORTANT DATES:

- ▶ Pricing: Available Now
- ▶ First Order: January 2019  
(202, 203, 302, 303)
- ▶ First Ship: January 2019  
(202, 203, 302, 303)

### »» COMPATIBILITY:

- ▶ Refer to Dealer Sell Sheet, page 2, for HVAC system compatibility.

### »» LIMITED WARRANTY:

- ▶ 1 year base, 5 year registered

### »» ACCESSORIES:

- ▶ BAYSEN30ATEMPA - remote wired ODT sensor
- ▶ ZZSENSAL0300AA - remote wired IDT sensor

Technical Literature: Available

[Dealer Sell Sheet: 18-MEQUI-1348](#)

Consumer Literature: 10-1106-21

## New Thermostat Model Numbers and Availability

### What's happening:

American Standard is introducing a new line of non-connected thermostats for 2019. In total six new models will replace seven of the existing models. Four of the models are available to ship now and the remaining two models will be available to ship this spring. The Silver 402 will remain in the non-connected line up and be available to purchase.

### Programmable Touchscreen:

The Gold 800, 802, and 803 will be replaced by 2 new thermostats that are easy to install, configure and simple to use. The new thermostats have many new features that fulfill a wider range of applications for American Standard and competitive HVAC systems. A common wire is preferred to power the new thermostats but not required to control many systems.

### Programmable Push Button:

The Gold 600 and 602 models will be replaced with 2 new models. The new thermostats are simple to install and use. Same as the touch screen models, a common wire is preferred to power the new thermostats but not required to control many systems.

### Non-Programmable:

The Silver200 will be replaced with a similar dedicated 1 stage heat, 1 stage cool thermostat and the Silver 401 will be replaced with a dedicated heat pump model. Both new thermostats are simple to install, setup and use. The new single stage heat and cool model is a 4 wire thermostat without a common terminal. The new dedicated heat pump model requires a common wire connection.

# NEW NON-CONNECTED THERMOSTATS FOR 2019

BUILT TO A HIGHER STANDARD™  
*American Standard*®  
 HEATING & AIR CONDITIONING

## Touchscreen Programmable Models

ACONT303AS42DA

- ▶ Up to 4 heat, 2 cool
- ▶ Humidity Sensor
- ▶ Common preferred, not required

Replaces  
 January 2019

ACONT803AS32DA

- ▶ Up to 3 heat, 2 cool
- ▶ Humidity Sensor
- ▶ Common required

ACONT302AS42DA

- ▶ Up to 4 heat, 2 cool
- ▶ Common preferred, not required

Replaces  
 January 2019

ACONT802AS32DA

- ▶ 802 - 3 heat, 2 cool
- ▶ 800 - 1 heat, 1 cool
- ▶ Common required

## Push Button Programmable Models

ACONT203AS42MA

- ▶ Up to 4 heat, 2 cool
- ▶ Common preferred, not required

Replaces  
 January 2019

ACONT602AF22MA

- ▶ Up to 2 heat, 2 cool
- ▶ Common required

ACONT202AS11MA

- ▶ 1 heat, 1 cool
- ▶ Common preferred, not required

Replaces  
 January 2019

ACONT600AF11MA

- ▶ 1 heat, 1 cool
- ▶ Common required

## Push Button, Non-Programmable Models

ACONT103AN21HA\*

- ▶ Up to 2 heat, 1 cool
- ▶ Common required

Replaces  
 June 2019

ACONT401AN21MA

- ▶ Up to 2 heat, 2 cool
- ▶ Common required

ACONT102AN11AA\*

- ▶ 1 heat, 1 cool
- ▶ No common terminal

Replaces  
 May 2019

ACONT200AN11AA

- ▶ 1 heat, 1 cool
- ▶ Common required

\*Models ACONT103AN21HA and ACONT102AN11AA are listed incorrectly in the 2019 product handbook. The 13th character in both models were revised after the handbook was printed.
